FOUNTAIN VIEW OF MONROE RECEIVES 2nd CONSECUTIVE

“DEFICIENCY FREE” SURVEY FROM STATE OF MICHIGAN

MONROE, MICHIGAN

(FEBRUARY 15, 2016)

Fountain View of Monroe, a Ciena Healthcare Management rehabilitation and nursing center in Monroe, Michigan has received a **Second Consecutive Deficiency Free Survey** from the State of Michigan’s Bureau of Health Services, Licensing and Regulatory Affairs Division. To receive a Deficiency Free Survey is a gold standard only achieved by 4.1% of all the nursing centers in Michigan. To receive a second Deficiency Free Survey is unprecedented.

Annual inspection surveys, required by statute, are unannounced and conducted at the center over a several day period. The State survey team evaluates all areas of the daily operations of the nursing center, such as nursing practices, food temperatures, fire drills, cleanliness and policies and procedures related to every department within the nursing center. Resident, staff and family interviews are also conducted as a part of this process. This evaluation encompasses hundreds of rules and regulations established in State and Federal guidelines. The Survey team determined that Fountain View of Monroe was in complete compliance and was issued a Deficiency Free Survey.

“To receive a second Deficiency Free Survey in this demanding health care environment is an exceptional accomplishment by every staff member across all departments,” said Terence Mambort, Administrator of Fountain View of Monroe. “This accomplishment is a tribute to every staff member who takes on personal responsibility for the care of our residents.”

About Ciena Healthcare

With nearly 4,000 licensed beds, Ciena Healthcare comprises the largest privately owned operators of skilled nursing and rehabilitation centers in Michigan. Founded in 1998 by Mohammad Qazi, Ciena Healthcare Management communities offer a holistic approach to resident care fully committed to resident’s needs and well-being while also promoting their independence.
